

DAMAGING TO THE CROPS

Farm Work Retarded by Rain and Cool Weather.

A Bulletin issued by the Agricultural Department—Warmth and Sunshine Needed in Almost All Sections—Much Injury Done to Wheat.

The Climate and Crop Division of the Department of Agriculture has issued a bulletin indicating the effect and extent of the recent rains and cool weather on crop conditions throughout the country. The report shows that in nearly every State agriculture has been retarded.

This is the fourth consecutive week of abnormally cold weather over nearly the whole country, with the most marked deficiency of the season in the central valleys and Southern States, and heavy precipitation throughout the country. The report shows that in nearly every State agriculture has been retarded. The report says:

STOMACHS THAT WON'T WORK

That Retain the Food and Refuse to Digest It, Make the Head Heavy and the Nervous System Suffer.

Stuart's Dyspepsia Tablets.

There is a cure for dyspepsia. Sufferers who have tried noxious nostrums will probably be skeptical, but scientific analysis shows that Stuart's Dyspepsia Tablets are tried. Whether the trouble is dyspepsia of long standing or merely a simple case of indigestion, relief is prompt and pronounced. The less the trouble the fewer tablets are taken.

Headaches after eating, sour stomach, as indicated by belching, fatigue with slight exertion, with no exertion at all, disturbed sleep, nervousness, constipation, depression, "blues," these things can be set down as symptoms of dyspepsia. And dyspepsia is merely indigestion in an aggravated form.

By immediate perfect digestion, Stuart's Dyspepsia Tablets produce strong, healthy, restful, refreshing sleep, and blood, and good, sound, healthy flesh. They make the skin clear, the eyes bright, the mind clear.

Stuart's Dyspepsia Tablets are a medicine and more than a medicine. They digest the food, and make it easy of digestion, and they relieve the inflamed, diseased condition of the membranous linings and glands of the stomach and bowels. They help the digestive organs over the hard places, and put them into a healthy condition.

They are a quick and permanent cure. You don't have to continue taking them forever. Still it is at the first return of the trouble.

Perfectly well people are made sick by eating too much, or unwholesome food, but not if they take a tablet after eating. Stuart's Dyspepsia Tablets are a medicine and more than a medicine. They digest the food, and make it easy of digestion, and they relieve the inflamed, diseased condition of the membranous linings and glands of the stomach and bowels.

They are a quick and permanent cure. You don't have to continue taking them forever. Still it is at the first return of the trouble.

TO MINIMIZE THE DANGERS

Regulations Concerning the Use of Automobiles Here.

Major Sylvester Will Make Recommendations to the Commissioners, Throwing Safeguards Around Human Life—Rights of Pedestrians.

The dangerous condition of the streets of Washington, and the danger to the public safety, has been the subject of the serious consideration of Major Sylvester, the Chief of Police of the District, for some time, and it is estimated that the draft of several prospective additions to the police regulations will shortly be forwarded to the Commissioners for approval.

Major Sylvester has been aware for some time of the constantly increasing danger to pedestrians and others on the public thoroughfares, and has taken every means in his power to correct the abuses that give rise to this condition of affairs. So far his efforts have been futile. A corps of bicycle policemen were recently detailed to patrol the prominent thoroughfares and arrest those persons who are found driving their vehicles at an unlawful rate of speed. But few arrests have been made, and those who have been taken into court, it is claimed, have escaped with light fines.

"The most serious offenders are the operators of automobiles and other self-propelling vehicles," said an old policeman today. "No matter how sensible a man may normally be, when he places himself in the driver's seat of an automobile, he loses his common sense, and the controller of an automatic vehicle in one hand and the steering rod in the other he appears to lose all judgment."

When bicycles were introduced and the smooth floor-like of the streets was found to be too slippery for the riders thereof to excessive speed the people were awakened to the new danger and regulations were made and enforced that soon minimized the danger. When rapid transit cars were introduced, the same regulations were made and enforced that soon minimized the danger.

The same regulations were made and enforced that soon minimized the danger. When rapid transit cars were introduced, the same regulations were made and enforced that soon minimized the danger.

Myers' Pure Malt Whiskey

—has science behind it. It has experience behind it. It has common sense behind it.

It has the endorsement of physicians behind it.

Ask any man who really knows the facts of the distilling business and see if he doesn't tell you that Myers' Pure Malt Whiskey, if used as directed,

Is Health.

See if the standard of quality is not accorded to this product by every competent authority.

Whiskey, properly made and properly used, is a perfect digestive stimulant.

Not everyone needs such a help; vastly more need it than think they do.

Let your physician say the word.

"The Truth" is a little book, let in which Angelo Myers tells some surprising facts about Whiskey. Free at any grocery or liquor store.

FRANK HUME, 454 Pennsylvania Ave.

THE ALLEGED LEPROSY CASES.

One of the Afflicted Baltimore Women Found by the Authorities.

BALTIMORE, April 24.—The support of leprosy cases, which exist in Baltimore was located yesterday at 115 East Pratt Street, the victim being Mrs. Mary Glaser, a widow, who has spent most of her life in Baltimore.

Health Commissioner Bosley said on Monday there was some doubt, and it now appears probable that the woman is not a leper at all. She is at present isolated in her own home and in charge of Dr. Sylvester, who has attended her for more than a year.

Dr. Sylvester said last night: "I do not believe Mrs. Glaser has leprosy, and the opinions of a number of eminent specialists who have examined her coincide with mine. About a year ago there was a suspicion of leprosy, but at this time I am certain the woman is not a leper. Dr. William Osler, of the Johns Hopkins Hospital, who examined her, pronounced her a case of hysteria."

The woman was for a time in a hospital in the city and was examined by a number of physicians. Dr. Osler, of the Johns Hopkins Hospital, and Dr. Sylvester, who made microscopic examinations and agreed that the case was not one of leprosy. Other physicians differed from this opinion, and the case was referred to the Board of Health.

Dr. Bosley will investigate both cases further, but would not discuss his plans beyond saying he did not see how he could incarcerate a person whom he did not believe to be a danger to the public health, as the disease of leprosy is not contagious.

Dr. Bosley, the bacteriologist of the Health Department, explained yesterday that there has been discovered a distinct form of leprosy, which he called "leprosy of the face." It is a new form of the disease, one being the tubercular form, in which the face is affected, and the other is the "leprosy of the face," in which the face is affected.

Dr. Bosley said that the most unusual thing in the case of Mrs. Glaser is that she is a married woman, and has two children. He said that he believed such a case is a new one in the history of the disease.

Dr. Bosley said that the most unusual thing in the case of Mrs. Glaser is that she is a married woman, and has two children. He said that he believed such a case is a new one in the history of the disease.

NEWS FROM GEORGETOWN

Repairs to Be Made on the Chesapeake and Ohio Canal.

The Williamsport Level to Be Drained—The University Boat Crew to Participate in the Poughkeepsie Races—Funeral of Dr. James Evans.

It is proposed to drain the Williamsport level of the Chesapeake and Ohio Canal, and make repairs at once. Eighteen inches of earth have been washed off of the towpath at the four-mile level and a similar quantity at the seven-mile level, near Hancock.

The Georgetown boat crew will compete again in the Poughkeepsie races. While a good showing was made last year, the Blue and the Gray boys have determined to go in to win this year.

The Cyrus Kalber property, opposite the cemetery, bought by a syndicate for cemetery purposes, has been subdivided and converted into residence sites, the cemetery idea having been abandoned. This was to have been one of the system of cemeteries, managed by New York State investors.

Dr. James Evans, well known in Georgetown, died yesterday at his residence, 212 M Street. While Dr. Evans had been ill for nearly three years, the end came unexpectedly. He was a brother of Dr. Henry Evans, of F Street north-west.

The ladies of the Southern Methodist Church will tender a reception to the pastor, Rev. F. L. Day, Friday evening.

The "Girl's Friendly" gave a musical literary entertainment at the Episcopal Chapel, Tenleytown, last night.

The Methodist Cemetery at Tenleytown is receiving attention. Grades and walks are being established and the city of the dead appropriately enclosed. Many new monuments have been set up, since the work began.

Henry Lucas, colored, while delivering a sermon at the Methodist Church on Massachusetts Avenue, fell from his seat, one of the wheels of the cart passing over his right leg, badly spraining it. He was taken to the Georgetown University Hospital in the Seventh Street patrol wagon. Lucas lives at 57 Prospect Street, Tenleytown.

A. Masherville, residing at 1323 Thirtieth Street, reported to the police this morning, that some unknown person tried to force an entrance to his house, through a rear window, last night.

Mrs. Emily A. Moxley, who has been confined to her home, Thirtieth and P Streets, by illness, for the past month, has entirely recovered.

Mr. Calvin Payne, of the Times reporter this morning, Georgetown's big fountain has been taken down, and is being moved to a new location. The fountain has been a standing joke, its massive basin looping over the edges of a triangular reservation, only large enough, to accommodate a few children, and a few other rats.

Mr. Hurley, a member of the city council, is disappointed to learn that it is to be set up in Truxton Circle. He should go to the Buffalo Exposition, as Georgetown's exhibit.

ALEXANDRIA, Va., April 24.—The regular semi-monthly meeting of the city council was held last night, with Hubert Smith as reporter. The members were present. The meeting was called to order at 8:30 o'clock and adjourned at 9:55 o'clock, and between times transacted considerable routine business.

The Committee on Streets reported favorably on the petition to remove the fence at the intersection of Gibson and Henry Streets back to the proper lines, and their report was adopted. The city engineer reported on the petition to remove the fence at the intersection of Gibson and Henry Streets back to the proper lines, and their report was adopted.

The Committee on Public Property reported unfavorably on a petition asking for an appropriation of \$21 for the erection of a fire plug at the almshouse. The report was adopted.

WEAKENING DAILY.

The Progress of Pulmonary Disease.

Just a few years past a young wife leaned upon the strong arm of a stalwart husband. He was so big, so strong, that she felt a sense of perfect protection, of complete security.

After so short a time the once strong man leans heavily on the arm of his wife, who is so big, so strong, that she feels a sense of perfect protection, of complete security.

That story scarce needs explanation. Almost anyone will recognize the consumptive in the weak and wasted husband.

A darkened room, a gasping sufferer in bed. Hectic burns in his face; emaciation has stripped the body of its fat; his eyes are sunken, and his breath is harsh, tearing cough, followed by a trickling stream of blood which stains the pillow.

Friends look on helplessly. The doctor is pitted and powerless. He says: "You will never be well again." At this crisis the hope is dead, and help seems impossible. Dr. Pierce's Golden Medical Discovery is tried, and slowly and surely the man begins to get better. The cough ceases, the blood comes back, the strength returns, and the man is well again.

When I commenced taking Dr. Pierce's Golden Medical Discovery, I was in a very bad way. I had been ill for some time, and my health was completely ruined. I had lost my appetite, and I was unable to do any work. I had been told that I was dying, and I was very much discouraged.
